Lecture 1 - Introduction

What is HCl?

What is HCI?

Human Computer Interaction

Human | Computer | Interaction

- Human
 - Users
 - an individual or a group using the system

Human | Computer | Interaction

- Human

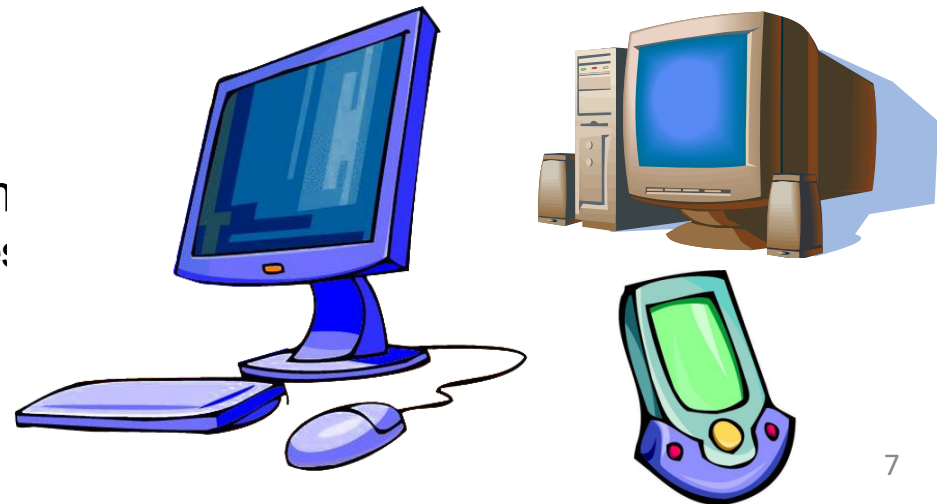

- Users

- an individual or a group using the system

- Computer

- Machine or network of machines running the system
 - desktop PCs, handheld devices, embedded systems etc.

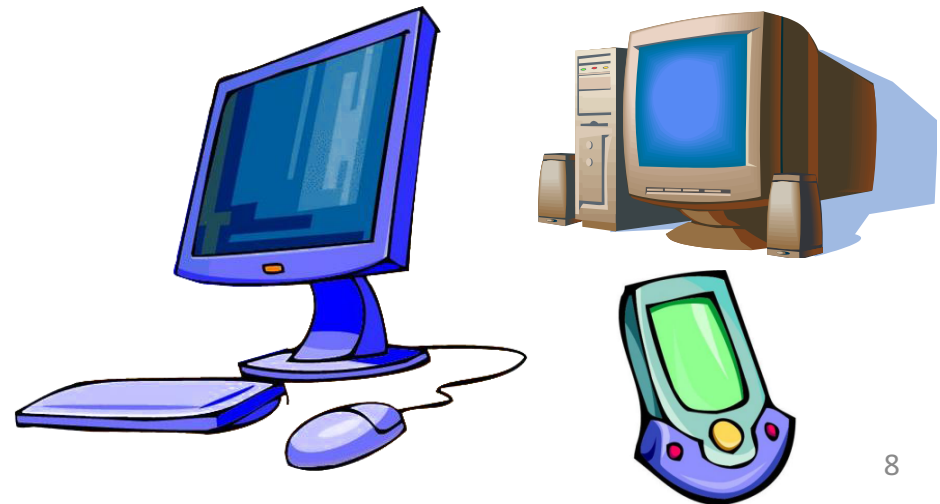

Human | Computer | Interaction

Human

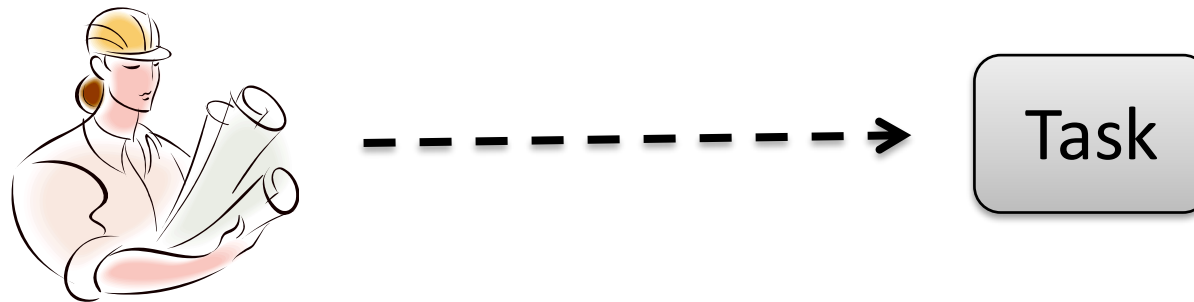

- Users
 - An individual or a group using the system
- Interaction
 - With interface representing the system
- Computer
 - Machine or network of machines running the system
 - desktop PCs, handheld devices, embedded systems etc.

Goals

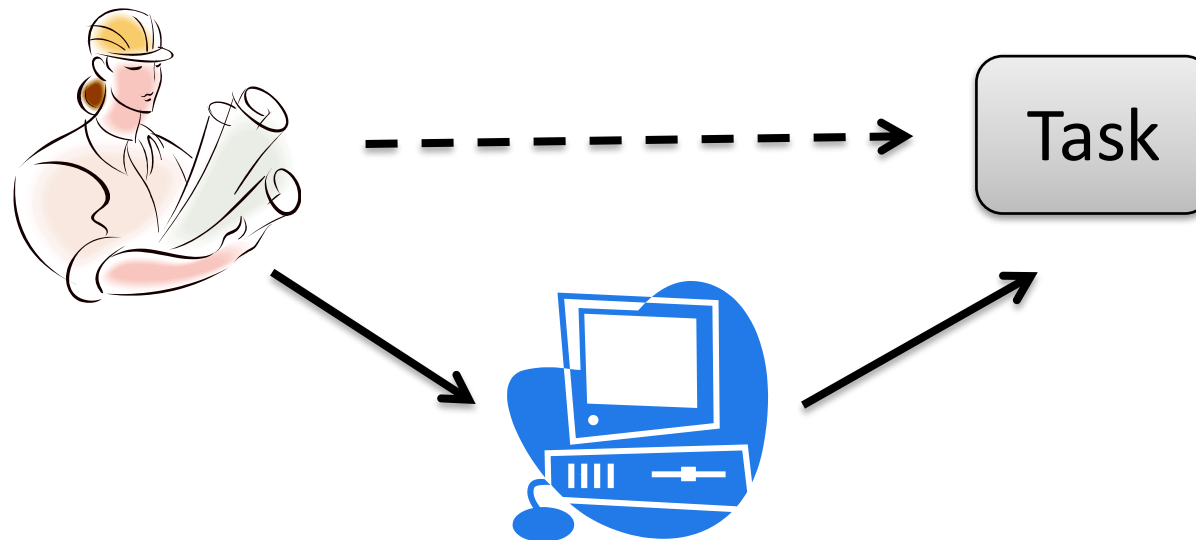

- Humans are trying to accomplish different tasks in their lives

- Bank Account, e-government, online information access

Goal of HCI

- Humans are trying to accomplish different tasks in their lives

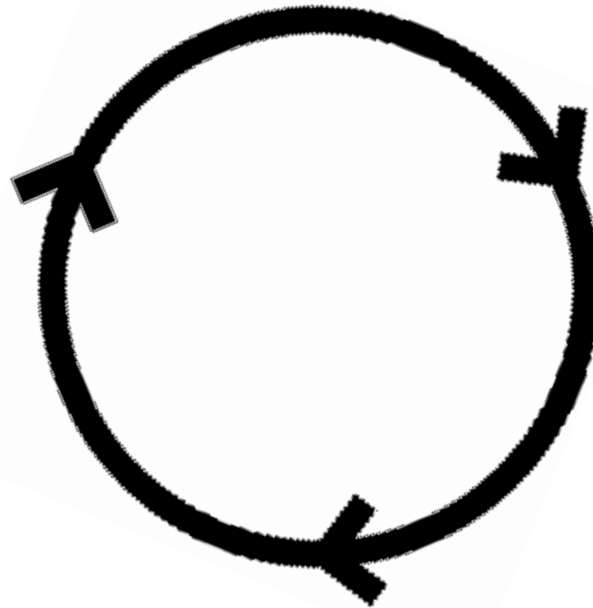

- Introduce a system, and represent it with a User Interface that should **maximize** their ability.

Applied Perspective

HCI is about

Design

Implementation

Evaluation
of
User Interfaces

Research Perspective

HCI is about

developing effective interaction techniques

Examples

Semantic Pointing

Marking Menus

Lets make a little digression

An accident

- On January 20, 1992, Air Inter Flight 148 crashed into the Vosges Mountains while approaching Strasbourg Airport in Strasbourg, France. 87 of the 96 crew and passengers on board were killed. So why am I writing about a horrible accident ?

An accident

- On January 20, 1992, Air Inter Flight 148 crashed into the Vosges Mountains while approaching Strasbourg Airport in Strasbourg, France. 87 of the 96 crew and passengers on board were killed. So why am I writing about a horrible accident ?

Because of the cause of the crash.

HCI

Bad Design costs lives, money, & time

HCI

Bad Design costs lives, money, & time

- We will learn different techniques about
 - how to effectively design and evaluate user interfaces

Prototyping : A Design Technique

- Prototyping is a strategy for efficiently dealing with things that are hard to predict

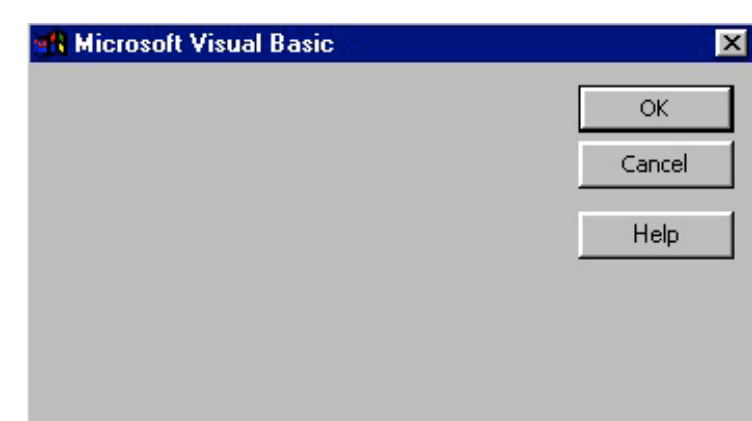

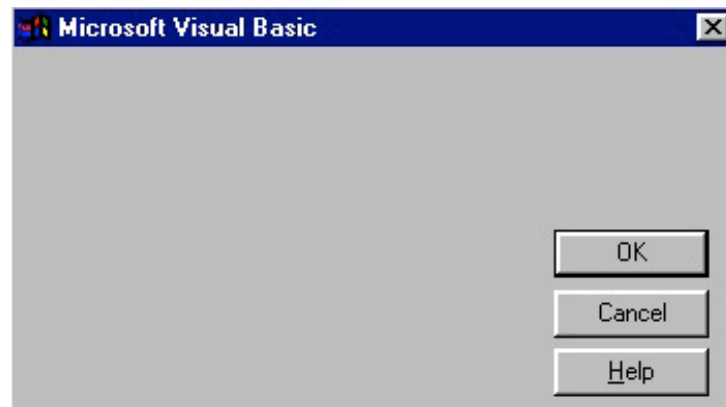

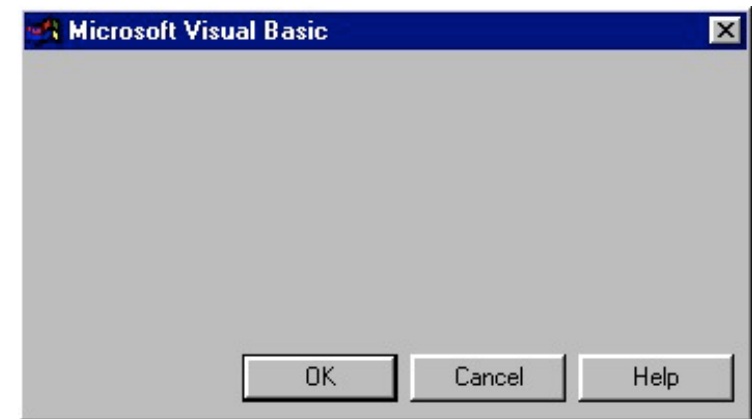

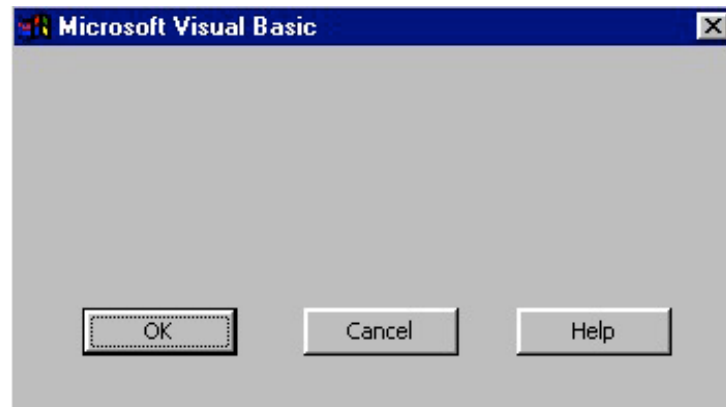

Prototyping

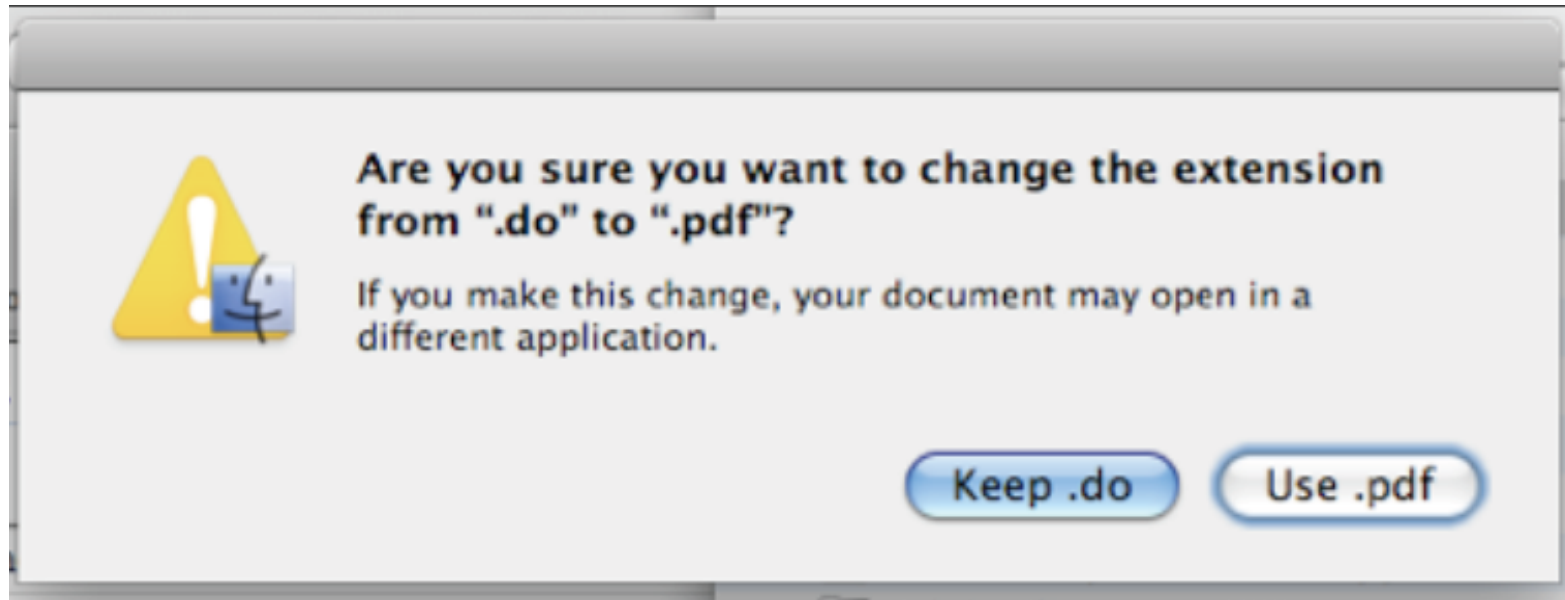

- SANTA CLARA, California – People thought Jeff Hawkins was crazy when they saw him taking notes, checking appointments, and synchronizing a small block of wood with his PC, pretending all the while that the block was a handheld computer. *“If I wanted to check the calendar I'd take it out and press the wooden button.”*

Evaluation

Evaluation

An effective Interface

Programming Assignments (tentative)

- Shared Drawing Tool (Javascript)
- Interactive Visualization (Processing)
- Intelligent Multimodal Interaction (Andriod)

Mother of all Demos

Inventor of the mouse (1963)

Bimanual interaction

Hypertext, cooperative work, document sharing

video-conferencing
